

ALERT TO CUSTOMERS ON CARD SKIMMING IN ATMs

- ATM Skimming Devices are fraudulently attached to ATMs to read the card data from Customers' ATM card magnetic stripe which holds encoded user details.
- Additional information about PIN is obtained by a hidden pinhole camera or devious keypad overlay.
- Please take necessary precautions to protect your ATM PIN and change the PIN number frequently
- While using ATM machine, please look out for any unusual or suspicious devices on the ATM machine.
- In the event of a skimmer device found in the ATM machine, please call the customer care number immediately or alert the Bank directly.
- Bank seek the support of our customers for a safe and secure usage of ATMs
- The following pictures will give an idea of how the skimming devices are fixed in the ATM machine.
